REMARKS

The figures of births and deaths shown in this statement for week ending the 29th October, 1955 relate to 143 towns with an estimated population of 17,389 thousands. The total number of towns is 300 and their population is 38,988 thousands. Thus 48% of the total number of towns representing 45% of the total population is covered in this statement. The number of births and deaths recorded in these towns were 10,318 and 3,527 representing birth and death rates of 30.9 and 10.5 per thousand of population respectively.

(a) States (Parts A & C).—The data here relate to 123 towns with an estimated population of 14,496 thousands. Information about Ajmer, Bihar Bombay, Madhya Pradesh, and West Bengal could not be included. The total number of towns is 252 and their population is 32,572 thousands. Thus 49% of the total number of towns representing 45% of the total population is covered. The number of births and

deaths recorded in these towns were 9,099 and 3,005 representing birth rates and death rates of 32.6 and 10.8 per thousand of population, respectively. The table at the end gives the position by States.

No town recorded a high death rate of 50 or over per thousand of population.

(b) States (Part B).—The data here relate to 20 towns with an estimated population of 2,893 thousands. The total number of towns is 48 and their population is 6,416 thousands. Thus 42% of the total number of towns representing 45% of the total population is covered. The number of births and deaths recorded in these towns were 1,219 and 522 representing birth and death rates of 21.9 and 9.4 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
